

Update and turbo of digitalization for internal security International specialized trade fair, conferences and trainings

+++ Final report +++

- **171 exhibitors from 20 countries and 2,294 participants from 30 countries**
- **Closed information and network platform for authorities, focus on the digitalization for internal security**
- **Patron: Peter Beuth, Hessian Minister of the Interior and Sports**

On 26 and 27 April 2023 GPEC® digital took place at Messe Frankfurt as closed and face-to-face authority event. It was the second GPEC® digital focussing on all questions and products of the digitalization of internal security after the first edition in 2019 as extract from the all subject and equipment areas encompassing GPEC® and since the year 2000 the now 14th GPEC® event.

A framework programme including conferences and official working group meetings up to practical trainings again and again makes GPEC® an indispensable branch forum – for the exchange of information and networking with leaders, procurement officers, technicians, trainers as well as end users inter-ministerial from the Federal Government and the Länder, from Germany and abroad. GPEC® digital is organized separately in the uneven interim years. In even years it was and remains an integral part of the all-encompassing GPEC®.

All participants from authorities and the industry are actively engaged in filling the digitalization with real life and in making the best possible use of digital technologies for police and security organizations and their efficient work.

Highlights 2023 were the annual Spring conference of the heads/presidents of the Offices of Central Services, the Specialist Forum of the project group Police 20/20 as well as two new conferences:

- Innovations radar of internal security: inventing the future and developing ideas ready for operations
- Financial investigations

Further conference topics: Automotive IT & Vehicles Forensics, 19th Control Room Congress incl. OSINT, Video Intelligence and forums/workshops: Telecommunication & internet monitoring, Drones, Critical Infrastructure Protection as well as trainings: European Police Trainers Conference and VR operational training in Virtual Reality of the recently established European network VR & Police

For more than 20 years GPEC® has aimed at supporting education and training, the exchange of information and networking between all authorities concerned with internal security on inter-ministerial, national and international level but also with innovative manufacturers and solution providers.

The next GPEC® event is the all-encompassing GPEC® from 6 to 8 May 2024 in Leipzig, including all GPEC® digital topics.
